*Rétro*

French Leader of Luxurious Faucets since 1910

# MARGOT

*Luxury tap fittings & accessories*

*Maitres Robinetiers de France* which appears amongst the luxury tap fittings and accessories leaders in France, invites you to discover their exceptional collections characterized by their refined materials and finishings:

**Margot Retro, Margot Classique and Margot Design.**

Each of our products has a hand-made manufacturing and the artisans *Maitres Robinetiers de France* have passed on their know-how so as to carry on in the footsteps producing these retro creations in the same way as our ancestors at the beginning of the 20<sup>th</sup> century.

The Margot products have been adopted by numerous designers, and a great deal of Palaces in France and all over the world have chosen our products for their refinement and high quality.

Being artisans, we are proud to manufacture made-to-measure products in a great variety of colours, which is an opportunity for designers to extend their power of creativity.

## The Vimeu area

It is in the "Vimeu" area around the Somme bay in north of France that, since 17<sup>th</sup> century, the brass works has been developed first for door hardware and since 19<sup>th</sup> century for faucets. In fact, at the beginning it was the local sand for foundry coupled to the sea and river routes for raw materials that have concentrated a large quantity of brass handcrafters in this area. Today, it is still 70% of french faucets that are manufactured there, due to these highly skilled workers.

## One century of faucets

Since 1908, date of the first faucet handmade in the small workshop which will become the Margot factory in the 50's, the creation spirit of 4 generations of workers allows us to benefit from a reserve of molds and drawings that contribute to the authenticity of our collections. Today, even our new models continue to respect the traditional know-how, but integrate the best of the 21<sup>st</sup> century technology.

## Brass foundry

With an internal complete Know-how, from foundry to plating, *Maitres Robinetiers de France* has developed prestigious lines of faucets maintaining the tradition of quality and excellence of its skilled handworkers.

## Brass tooling / Machining

As we have the opportunity to achieve the automatic lathe job by manual tooling, our skilled workers, due to their know-how and experience, can realize unique and authentic parts.

## Polishing

Totally handpolished, our faucets and accessories can benefit from sophisticated and authentic forms. It is a permanent visual control and 4 generations of know-how that grant an incomparable surface condition.

## Plating

For a perfect surface finish, our electrolytic plating use only very high quality metals like high purity nickel (more than 99.97% granted) or 23.5 carats gold

## Mounting

Each product is assembled by hand for a strictly precise mounting and for a final complete control including perfect association of the finishes of the plated parts and a technical control unit by unit.

092.7.46.SC Bath mixer on feet

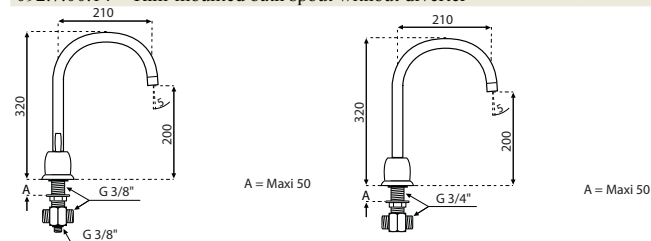

[illegible]

Technical drawing of a three-way connection for a water supply system. The drawing shows a central vertical pipe with a horizontal branch on the left and a diagonal branch on the right. Dimensions include a total width of 210, a vertical height of 70, and a horizontal distance of 360. Pipe diameters are specified as Ø 50, Ø 70, G 3/4", G 3/8", G 1/2", and G 1 1/2". A distance of 1500 is marked for the diagonal branch. A legend defines A as Maxi 50, B as Maxi 30, C as Drill 45 mm, and D as Drill 32 mm.

092.7.00.14 Rim-mounted bath spout without diverter

Technical drawing of the Maxi 50 pump assembly. The drawing shows a vertical assembly with a pump head at the top, a central shaft, and a base. Dimensions are indicated: a total height of 70 mm from the top of the pump head to the base, and a diameter of  $\varnothing 50$  mm for the central shaft. Components are labeled A and B. A note specifies A = Maxi 50 and B = 3/4" - Drill 30 mm. A connection point at the bottom is labeled G 3/4".

Technical drawing of a valve assembly. The drawing shows a vertical valve with a handle on top. Dimensions include a height of 70 mm from the top of the handle to the top of the valve body, and a diameter of  $\varnothing 50$  mm for the top section. The valve is labeled 'A = Mini 64' and 'Maxi 109'. The connection points are labeled 'G 3/4"' and 'G 3/8"'. The drawing is a side view showing the internal components of the valve.

Technical drawing of a drilling rig assembly. The drawing shows a vertical pipe with a horizontal arm attached. The arm has a drill bit at the end. Dimensions are given: G 1/2" for the arm's diameter, Ø 50 for the drill bit's diameter, A for the distance from the arm to the drill bit, B for the distance from the drill bit to the vertical pipe, and 1500 for the length of the vertical pipe. A legend indicates A = Maxi 30 and B = Drill 32 mm. Other labels include G 3/8" and G 1/2" for different pipe sections.

Technical drawings of three types of water faucets with dimensions in millimeters (mm) and inches (in):

- Standard Faucet:**
  - Spout height: 100 mm (4 in)
  - Spout diameter: G 1/2"
  - Base width: 220 mm
  - Base height: 55 mm
  - Base diameter: 40 mm
- Flexible Faucet:**
  - Spout height: 1500 mm
  - Spout diameter: G 1/2"
  - Base diameter: G 1/2"
- Double-Lever Faucet:**
  - Spout height: 170 mm
  - Spout diameter: G 1/2"
  - Base diameter: G 3/4"
  - Base width: 150 mm
  - Base height: 25 mm
  - Base depth: 30 mm

Technical drawing of a three-way shower mixer tap assembly. The drawing shows the tap body with three outlets: a central hot/cold water outlet and two side outlets for a shower head and a bidet. Dimensions include a total width of 210 mm, a central outlet diameter of Ø 70, and side outlet diameters of Ø 50 and Ø 30. Connection types are specified as G 3/4" and G 1/2". A legend defines the variables: A = Maxi 50, B = Maxi 30, C = Drill 45 mm, and D = Drill 32 mm.

Technical drawing of the Maxi 45 pump assembly. The drawing shows a vertical pump unit with a handle on top. Key dimensions and labels include:

- A vertical dimension line on the left indicates a height of 100 mm from the base to the top of the pump housing.
- A horizontal dimension line on the right indicates a diameter of  $\varnothing 60$  mm for the pump housing.
- Two connection points are labeled 'A' and 'B' on the right side of the pump housing.
- Two horizontal lines with arrows pointing right represent the output connections, both labeled 'G 3/8"'. One line is connected to point 'A' and the other to point 'B'.

Below the drawing, the following text is provided:

A = Maxi 45  
B = Drill 32 mm

Technical drawing of a valve assembly. The drawing shows a central valve body with three ports labeled "G 1/2\"". The top port has a dimension of "Ø 68" and a dimension "C" indicating a distance. The bottom port is labeled "G 1/2\"". The side ports are labeled "G 1/2\"". The text "C = Drill 45 mm" is written to the right of the drawing.

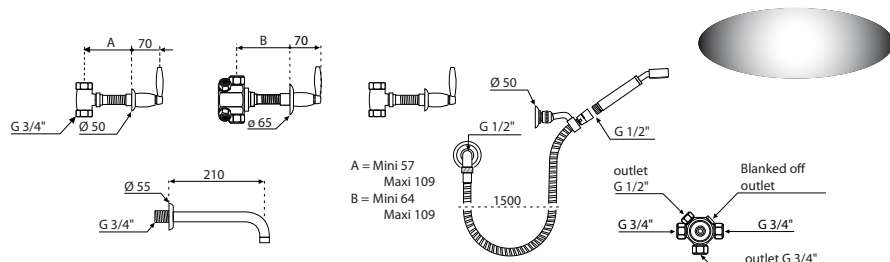

A = Maxi 30  
B = Drill 32 mm

# MARGOT USA GENERAL TERMS OF SALE

## 1. Application of the General Terms of Sale

The placing of an order shall be deemed consent to these General Terms of Sale.

## 2. Orders

Orders shall be deemed accepted and confirmed solely after receipt of a Written Acknowledgment of Receipt of Order.

## 3. Prices

The prices for the products are those listed in the most recent catalogue available at the time of the receipt of the order and the prices are given in USD free of any taxes. Prices and terms are subjected to change without notice.

## 4. Special Orders

All special order products are non-returnable and non-cancelable.

## 5. Delivery

The delivery time is not guaranteed. MARGOT USA shall proceed to the delivery of each order according to its product's stock availability.

Any delay of delivery times shall not entitle the customer to claim damages of any type and shall not entitle the customer to cancel the pending order. MARGOT USA reserves the right to ship merchandise by the method of our choosing.

## 6. Delivery Risks

Delivery to the carrier constitutes delivery to the customer. Any claim for loss of damage in transit should be made promptly by the customer to the carrier.

Our responsibility ceases when the goods are delivered in good condition to the carrier. For each delivery, the customer shall have to verify the conformity of the delivered products with respect to their specifications and to the quantities ordered.

The goods shall be deemed accepted by the customer within two (2) days upon receipt of shipment. Any returns of the goods are subject to our formal agreement; which agreement shall not be taken as an acknowledgment of our responsibility.

The goods must be returned within the original packaging.

## 7. Payment – Penalty

Each invoice shall be payable in full before the shipment of the goods. MARGOT USA reserves the right, in addition to all other remedies available, at its sole discretion and without prior notice to suspend deliveries and to refuse to honor any and all new orders until complete payment by the customer of all its overdue accounts and to invoice interest on overdue accounts at the rate multiplied by 10%.

## 8. Governing Law - Litigation

Any dispute arising from these General Terms of Sale is to be dealt with in a court of law, under the accordance of the laws held by the State of New York.

## 9. Title to products

Title to each product delivered by MARGOT USA shall pass to customer upon full payment by the customer of the said product. The customer shall keep the

delivered products in the individualized state as delivered until full payment of the said products by the customer. In the event the customer fails to pay in full, MARGOT USA reserves the right to request the return of the products by written demand with acknowledgment of receipt.

## 10. Warranty

The products are warranted against any operating defect for a period of five (5) years. The wearing parts (cartridges, gaskets, flexible hose, etc.) are not warranted.

As the beauty and the longevity of the finishes are directly linked to their maintenance (refer to paragraph s#11 and 14,) and to the cleaning products used, only the manufacturing defects visible at the time of acceptance of delivery are warranted (within a one-month notice). If this was the case, we would only replace the defective part. Work done under the terms of the warranty shall not increase the warranty.

For Warranty claims, please contact your MARGOT dealer, or you may write to:

**MARGOT USA - 50 Hill Street, #532  
Southampton, NY 11968**

Please include the original receipt with a description of the problem, model number, store and date of purchase, name of installer, and your name, address and telephone number.

## 11. Marine and Outdoor Installation

MARGOT faucets and all accessories are NOT warranted for Marine or Outdoor installations.

## 12. After-Sales Service

Our tap fittings must be set in the traditional way, specific to luxury brassware.

We draw the plumber's attention to the quality of the tap fittings and more particularly to their luxury finishes. In this way, we highly recommend the use of adapted tools (provided with synthetic tips.)

In case of difficulty:

If a minor defect is established, it is the plumber's responsibility to solve the problem (replacement of a basket, of a cartridge, etc.)

If the plumber feels that it is necessary, MARGOT USA will replace the defective part.

The plumber will thus replace the defective piece without requiring any extra payment.\*

*\* These services are the counter-part of a percentage granted to the plumber.*

The tap or the defective part must be sent back to us immediately.

**WARNING:** If after the analysis we do not observe any manufacturing defect, the tap or part will be invoiced. The process will be the same if the defective parts are not sent back to the factory.

## 13. Finishes

The finishes proposed in the color chart are for information only, as the printing process cannot give an exact reproduction of the original colors.

With regard to the technical and aesthetic improvement of the products, the manufacturer reserves the rights to modify at any time the products and accessories that they deem useful to the products without prior warning.

Photographs, illustrations and prices are given for information only.

Despite all the concern about its realization, this catalog cannot be taken as a contractual document.

## 14. Maintenance Advice

In order to maintain the original beauty of the taps and accessories, one must take certain precautions when cleaning our products. We strongly advise against washing the taps or accessories with acid or effervescent, pure bleach or scouring powder, as this will fade the surfaces of the products. We also strongly advise the use of a scratching sponge.

As a standard cleaning process we advise that our products be cleaned with a PH neutral liquid soap, rinsed with clean water and wiped with a non-fluffy cloth. However, to achieve the "polished nickel", it is advised to apply products specially recommended for silver-plated, raw brass and copper taps and accessories.

## 15. Finish Choice

We highly recommend our customers to complete their finish choice with the help of sample charts or colors available in our retailer's store, and particularly for the *Permalbrass\** finish.

### *\*The Permalbrass Finish*

This is a mixing of gold and nickel which gives a paler aspect than the gold finish.

### *\*\*Raw Brass*

This type of finish has no plating. It simply consists of the buffing of the material which is brass. Consequently, stains and even verdigris will automatically appear. These are not defects. Certain customers even demand this old aspect. Nonetheless, if you wish to maintain the polished aspect of raw brass, the sole solution will be to clean the tap fittings on a regular basis with a product specifically recommended for copper taps.

### *\*\*\* Lacquer Color*

If you wish to use lacquer-colored tap fittings, then we strongly suggest that the rubbing parts be ordered in chrome or nickel. The lacquer color, though of high quality, can't reach the same resistance as the classic finishes like the chrome or nickel finishes. Nonetheless, 100% lacquer-colored tap fittings are feasible of you take into consideration the rapid wearing of the rubbing parts.

## 16. Product Changes

We reserve the right to discontinue, alter, modify or redesign products without liability for the obsolescence of customer's inventories.
